

BYO Order

Pager for QR-Ordering Apps

**USE CONTACTLESS VIRTUAL PAGERS.
PERFECT FOR USE WITH QR-ORDERING.**

FEATURES AND BENEFITS

- * Enables self-collect restaurants to allow customers to self-order using QR-ordering.
- * Customers are issued virtual pagers that run on web browsers.
- * Virtual pager beeps when order is ready for collection.
- * Virtual pager is removed from web browser when order has been collected.
- * Totally contactless. Sanitization of the pagers between use is not necessary.
- * No more lost pagers. No need for chargers. No more dead batteries.

HOW IT WORKS

- * Use the BYO Order app to create tables that match each table in your restaurant..
- * Match the URL link for each table with the link provided by your POS vendor.
- * Paste the table QR codes downloaded from the BYO Order app on your tables.
- * Customers who scan the QR code to place an order will be given a virtual pager.
- * Right-swipe to notify customers when their order is ready for collection.
- * Left-swipe to remove customers from your Order list when the order is collected.

NEXT STEPS

- * Download the BYO Order app by scanning or clicking on this QR Code.
- * Create tables and match the URL links to your QR-ordering links.
- * Upgrade via in-app subscriptions when you need to add more tables / orders.
- * Send us an email if you require more table capacity or need help with setup of the app.
