# BYO QUEUE

Virtual Pager to Manage Your Queue

USE CONTACTLESS VIRTUAL PAGERS.

PERFECT FOR SELF-ORDERING KIOSKS.

FEATURES AND BENEFITS

* Configure up to 5 separate queues, with display texts in any language.

* Users remain anonymous. No worries about conforming with privacy protection laws.

* Connect via 3G/4G/5G/WiFi and get unlimited range. No need for signal repeaters.

* Users scan your QR code to open the Web Client without downloading any app.

* Totally contactless. Sanitization of the pagers between use is not necessary.

* No more lost pagers. No need for chargers. No more dead batteries.

HOW IT WORKS

* Use the BYO Queue app to create your own contactless queue.

* Configure up to 5 queues, if you provide different queues for different services.

* Display your QR code at your ordering counter or on your self-ordering kiosks.

* Allow users to self-scan to join your queue.

* Right-swipe to notify customers when order or table is ready.

* Left-swipe to remove customers from queue when order is completed.

NEXT STEPS

* Download the BYO Queue app by scanning or clicking on this QR Code.

* Configure your queues and try it out with 5 concurrent users.

* Upgrade via in-app subscriptions when you need to add more concurrent users.

* Send us an email if you require more user capacity or need help with setup of the app.
